

Gascon N

Wine grape variety.

Origin

This variety is originally from the north of France.

Use

Wine grape variety.

Name of the variety in France

Gascon

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Gascon is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the yellow young leaves,
- the circular dark green adult leaves, entire or with three or five lobes, with a closed petiole sinus with overlapping lobes, medium teeth with straight sides, no anthocyanin coloration of veins, a flat sometimes goffered leaf blade, blistered, and on the lower side of the leaves, a medium density of erect and prostrate hairs,
- the round-shaped berries.

Phenology

Bud burst: 6 days after Chasselas.

Grape maturity: mid-season, 3 weeks and a half after Chasselas.

Technological potential

The bunches are medium in size and the berries are small. Gascon produces very colored, lively and acidic wines with a medium degree of alcohol. Full maturity is necessary to obtain a good quality product.
