

# Genovèse B

### Wine grape variety.

### Origin

This variety is found in Corsica.

### Use

Wine grape variety.

### Name of the variety in France

Genovèse

### Synonymy

In Italy, Genovèse is officially designated as "Scimiscia". This synonym is officially recognized in France regarding plant propagation material.

### Regulatory data

In France, Genovèse is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### **Description elements**

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the green young leaves with bronze spots,
- the shoots with red internodes,
- the small dark green adult leaves, with five or seven lobes, deep lateral sinuses, with an open or slightly open U-shaped petiole sinus with naked petiole veins, long teeth compared to their width at the base with straight sides, strong anthocyanin coloration of veins, a revolute blistered leaf blade, and on the lower side of the leaves, a low to medium density of erect and prostrate hairs,
- the broad ellipsoid berries.

### **Evolution of mother vine surfaces**

| Year | 1958 | 1968 | 1979 | 1988 | 2000 | 2018 |
|------|------|------|------|------|------|------|
| ha   | 1    | 1    | 1    | 1    | 1    | 10   |

## Genetic profile

| MicrosatelliteVVS2 |     | VVMD5 | VVMD7 | VVMD27 | VRZAG62 | VRZAG79 | VVMD25 | VVMD28 | VVMD32 |
|--------------------|-----|-------|-------|--------|---------|---------|--------|--------|--------|
| Allele 1           | 131 | 223   | 239   | 176    | 188     | 252     | 240    | 235    | 237    |
| Allele 2           | 131 | 234   | 253   | 186    | 200     | 260     | 248    | 243    | 261    |

### Cultivation and agronomic skills

Genovèse is a vigorous variety, not very productive which must be trained. It is generally pruned long.

### **Clonal selection in France**

The only certified Génovèse clone carries the number 1133.

### Phenology

Bud burst: 2 days before Chasselas.

Grape maturity: mid-season, 2 weeks and a half to 3 weeks after Chasselas.

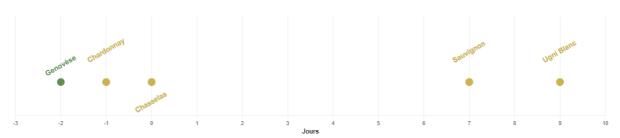

### **Technological potential**

The bunches are small to medium in size and the berries are medium in size. Genovèse has a good sugar accumulation potential. It produces charactertistic white wines, that are typical, elegant, with a nice balance between alcohol and acidity.

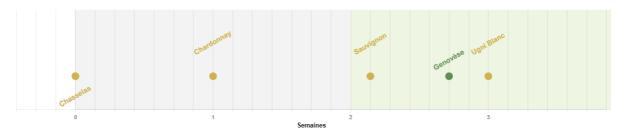

### Susceptibility to Diseases and Pests

Genovèse does not seem particulary susceptible to the main fungal diseases.

### Debourrement

### Maturité
