Cultivation and agronomic skills

The aptitudes are comparable to those of Aramon.

Clonal selection in France

The only certified Aramon gris clone carries the number 1280.

Phenology

Bud burst: 2 days after Chasselas.

Grape maturity: late-season, 4 weeks and a half after Chasselas.

Technological potential

The bunches are large and the berries are very large. Aramon gris only produces common white wines without any particular qualities.

Susceptibility to Diseases and Pests

Aramon gris has the same characteristics as Aramon.

Debourrement

Maturité
