Cultivation and agronomic skills

Mancin shows early budburst and moderate vigor. It is generally pruned long. This variety is moderately fertile but with a steady production.

Clonal selection in France

There is no certified clone for this variety yet.

Phenology

Bud burst: 3 days after Chasselas.

Grape maturity: mid-season, 2 weeks and a half to 3 weeks after Chasselas.

Technological potential

The bunches are large and the berries are medium in size. Mancin produces fairly balanced, well colored, relatively acidic and not very astringent wines.

Susceptibility to Diseases and Pests

Mancin is not very susceptible to powdery mildew.
