

# Muresconu N

Wine grape variety.

## Origin

This variety is found in Corsica and based on ampelographic and genetic studies carried out in Montpellier, it has been identified as a variety from Sardinia called Nieddu Mannu.

## Use

Wine grape variety.

## Name of the variety in France

Muresconu

## Synonymy

In France, this variety can officially be called "Morescono" regarding plant propagation material. In Italy, Muresconu is officially designated as "Nieddu Mannu".

## Regulatory data

In France, Muresconu is officially listed in the "Catalogue of vine varieties" on the A list and classified. This variety is also listed in the catalogue of Italy.

## Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the green young leaves,
- the circular or wedge-shaped, very large adult leaves, with five or seven lobes, deep lateral sinuses, a closed petiole sinus with very overlapping lobes, long teeth with straight sides, no anthocyanin coloration of veins, a twisted blistered leaf blade, and on the lower side of the leaves, a low to medium density of prostrate hairs,
- the round-shaped berries.

## Genetic profile

	MicrosatelliteVVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allele 1	131	223	239	176	188	258	240	227	261
Allele 2	143	232	249	191	188	262	240	257	271

### Cultivation and agronomic skills

Muresconu is very vigorous, productive with a semi-erect bearing. It must be pruned short.

### Clonal selection in France

The only certified Muresconu clone carries the number 1100. It comes from the surveys carried out in the Corsican wine-growing region. A conservatory of 20 or so clones was planted in the wine-growing region of Corsica in 2005.

### Phenology

Bud burst: 9 days after Chasselas.

Grape maturity: mid-season, 3 weeks and a half after Chasselas.

### Technological potential

The bunches are very large and the berries are large. Muresconu produces not very colored, ordinary quality wines, with low acidity.

### Susceptibility to Diseases and Pests

Muresconu is fairly susceptible to grey rot and moderately sensitive to powdery mildew and sour rot.
