

Olivette noire N

Table grape variety.

Origin

This table grape variety is of natural origin.

Use

Table grape variety.

Name of the variety in France

Olivette noire

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Olivette noire is officially listed in the "Catalogue of vine varieties" on the A list. This variety is also listed in the catalogue of Portugal.

Description elements

The identification is based on:

- the tip of the young shoot with a low density of prostrate hairs,
- the yellow young leaves with bronze spots,
- the circular adult leaves, entire or with five lobes, with shallow lateral sinuses, a slightly open or closed U-shaped petiole sinus, small teeth but long compared to their width at the base with straight sides, no anthocyanin coloration of veins, a twisted finely blistered leaf blade, and on the lower side of the leaves, no erect and prostrate hairs,
- the narrow ellipsoid berries.

Cultivation and agronomic skills

Olivette noire is a very late-season variety, moderately vigorous with a horizontal bearing. It must be trained and pruned long.

Clonal selection in France

The only certified Olivette noire clone carries the number 1138.

Phenology

Bud burst: 8 days after Chasselas.

Grape maturity: very late season, 6 weeks and a half after Chasselas.

Technological potential

The bunches are medium to large and moderately compact. The berries are large to very large, simple-flavored, with a thick skin and a crunchy pulp.

Susceptibility to Diseases and Pests

Olivette noire is very little susceptible to grey rot.
