

# Perdin B

Variety exclusively for amateurs and private domestic use.

## Origin

This variety was obtained in 1981 by INRA. This interspecific hybrid results from the crossbreeding of 7489 INRA and Perle de Csaba.

## Use

Variety exclusively for amateurs and private domestic use.

## Name of the variety in France

Perdin

## Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

## Regulatory data

In France, Perdin is officially listed in the "Catalogue of vine varieties" on the A list.

## Description elements

The identification is based on:

- the tip of the young shoot with a low density of prostrate hairs,
- the green young leaves with bronze or reddish spots,
- the circular adult leaves, with five or seven lobes, a U-shaped petiole sinus with overlapping lobes, with often naked petiole veins, short to medium teeth with straight sides, a weak to moderate anthocyanin coloration of veins, a moderately blistered, twisted or involute leaf blade, sometimes goffered or undulate near the petiole sinus, and on the lower side of the leaves, a low to medium density of erect hairs and no or a very low density of erect hairs,
- the round-shaped or broad ellipsoid berries, with a mucat or aromatic flavor.

## Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allele 1	131	229	247	176	202	256	240	245	271
Allele 2	143	234	260	186	204	262	240	267	271

### Cultivation and agronomic skills

Perdin displays moderate vigor. This variety, with a semi-erect to horizontal bearing, must be trained and can be pruned short or long. Perdin is a little susceptible to millerandage.

### Susceptibility to Diseases and Pests

Perdin is not very susceptible to downy mildew, powdery mildew and grey rot, but it must be grafted.

### Clonal selection in France

The only certified Perdin clone carries the number 5003.

### Phenology

Bud burst: 1 day before Chasselas.  
Grape maturity: early-season, 1 week after Chasselas.

### Technological potential

Perdin's bunches are medium in size. The berries are also medium in size, juicy with a thin skin.
