

Piquepoul gris G

Wine grape variety.

Origin

This variety corresponds to the grey mutation of Piquepoul noir.

Use

Wine grape variety.

Name of the variety in France

Piquepoul gris

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Piquepoul gris is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The description corresponds to that of Piquepoul blanc, except for the skin color of the berries when ripe, which is, in this case, grey. The anthocyanin coloration of the internodes of the shoots seems more pronounced than for Piquepoul blanc.

Cultivation and agronomic skills

Piquepoul gris shares the same characteristics as Piquepoul blanc, with a slightly higher production.

Clonal selection in France

The two certified Piquepoul gris clones carry the numbers 71 and 293.

Phenology

Bud burst: 6 days after Chasselas.

Grape maturity: late-season, 4 weeks and a half after Chasselas.

Technological potential

The bunches are large and the berries are medium in size. Generally vinified as white wine, Piquepoul gris produces wines with a good acidity.

Susceptibility to Diseases and Pests

Piquepoul gris is very susceptible to grey rot.
