

Rayon d'Or B

Wine grape variety.

Origin

Rayon d'Or (an interspecific hybrid) is the result of a crossbreeding between 405 Seibel and 2007 Seibel.

Use

Wine grape variety.

Name of the variety in France

Rayon d'Or

Synonymy

In France, this variety can officially be called "4986 Seibel" regarding plant propagation material.

Regulatory data

In France, Rayon d'Or is officially listed in the "Catalogue of vine varieties" on the A list and classified. This variety is also listed in the catalogue of the Netherlands.

Description elements

The identification is based on:

- the tip of the young shoot with a medium density of prostrate hairs,
- the green young leaves,
- the small pentagonal adult leaves, with five or seven lobes, deep lateral sinuses, a slightly open or closed with overlapping lobes U-shaped petiole sinus, large teeth, not numerous, short compared to their width at the base with convex sides, an involute, funnel-shaped, smooth and shiny leaf blade, and on the lower side of the leaves, a low density of erect hairs,
- the round-shaped berries

Cultivation and agronomic skills

Rayon d'Or is fairly fertile and can be pruned short or moderately long. It is best to trellis this variety.

Clonal selection in France

The only certified Rayon d'Or clone carries the number 1199.

Phenology

Bud burst: 1 day after Chasselas.

Grape maturité: early-season, 1 week and a half after Chasselas.

Technological potential

The bunches are medium in size and compact. The berries are also medium in size and very firm. Rayon d'Or produces quite heavy and ordinary wines.

Susceptibility to Diseases and Pests

Rayon d'Or resists well to downy mildew, black rot and to powdery mildew.
