Allele 2	131	223	247	182	204	252	240	257	239

Cultivation and agronomic skills

Terret gris has chacteristics comparable to thoses of Terret noir. It is also fairly susceptible to browning.

Technological potential

The bunches and berries are large. Terret gris produces neutral wines with a low alcohol degree.

Clonal selection in France

The only certified Terret gris clone carries the number 1219. Selection work is underway following surveys carried out in the wine-growing region of Hérault. A conservatory of ten or so clones was planted in the French department of Hérault in 2003.

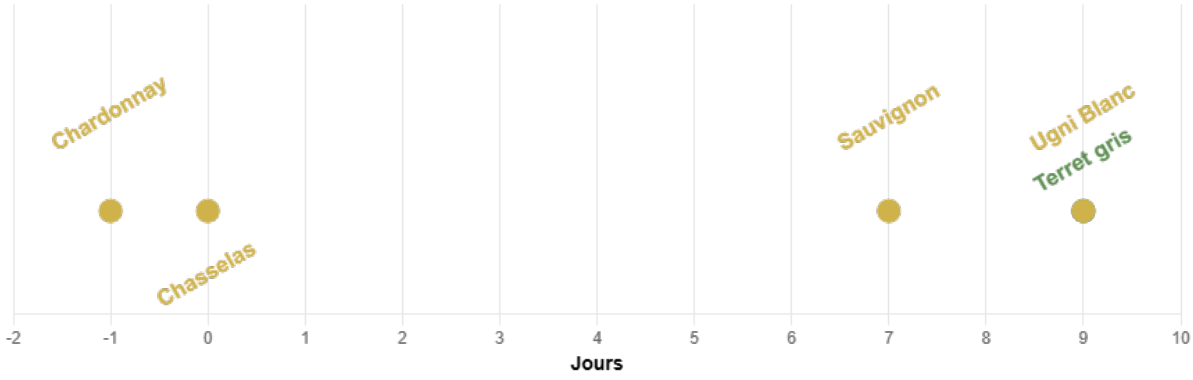

Susceptibility to Diseases and Pests

The behavior of Terret gris towards diseases is comparable to that of Terret noir.

Phenology

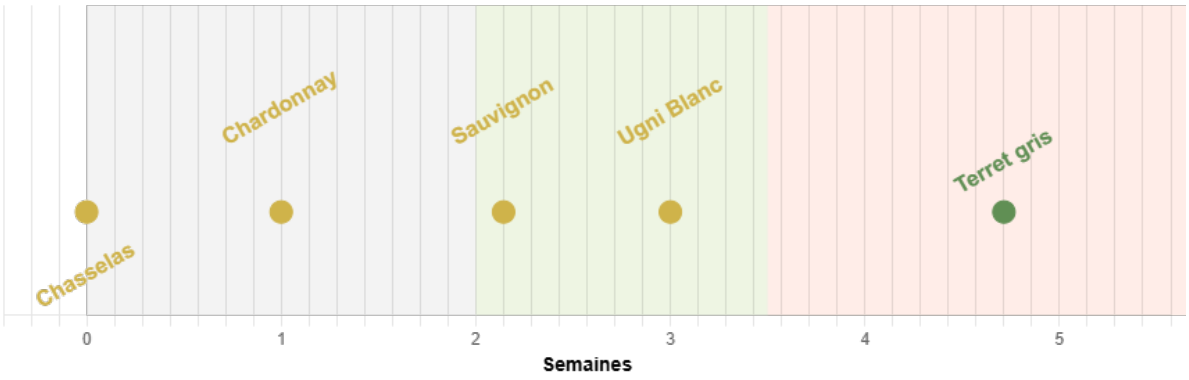

Bud burst: 9 days after Chasselas.
Grape maturity: late-season, 4 weeks and a half to 5 weeks after Chasselas.
