

Bia B

Wine grape variety.

Origin

Bia is an old variety from the Isère valley and the Rhône region.

Use

Wine grape variety.

Name of the variety in France

Bia

Synonymy

In France, this variety can officially be called "Bia blanc" regarding plant propagation material.

Regulatory data

In France, Bia is officially listed in the "Catalogue of vine varieties" since 2011 on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the green young leaves with slightly bronze spots,
- the shoots with a ribbed surface,
- the circular adult leaves, with five or seven lobes, fairly deep lateral sinuses, an open U-shaped petiole sinus, small to medium teeth with straight sides, no anthocyanin coloration of veins, a flat or slightly involute, finely blistered leaf blade, and on the lower side of the leaves, a low to medium density of erect and prostrate hairs,
- the slightly ellipsoid berries.

Cultivation and agronomic skills

Bia is moderately vigorous, with a semi-erect bearing, and is generally pruned long.

Clonal selection in France

The only certified Bia clone carries the number 1282.

Phenology

Bud burst: 5 days after Chasselas.

Grape maturity: mid-season, 3 weeks and a half after Chasselas.

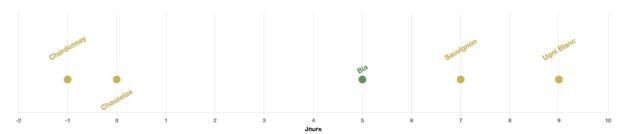

Technological potential

Bia's bunches and berries are medium in size. This variety, with a very good balance between sugar potential and acidty, produces pleasant, elegant and slightly aromatic wines.

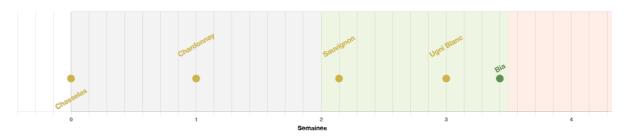

Susceptibility to Diseases and Pests

Bia is a little susceptible to downy mildew and grey rot.
