

# Picarlat N

# Wine grape variety.

### Origin

This variety was obtained by INRA and SICAREX Beaujolais in the 1980's and results from the crossbreeding of Pinot noir and Cabernet-Sauvignon.

### Use

Wine grape variety.

### Name of the variety in France

Picarlat

### Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Regulatory data

In France, Picarlat is officially listed in the "Catalogue of vine varieties" since 2014 on the A list and classified.

### **Description elements**

The identification is based on:

- the tip of the young shoot with a medium density of prostrate hairs and a piping distribution of anthocyanin coloration,
- the copper or reddish young leaves, with a medium density of prostrate hairs,
- the shoots with a ribbed surface and short light red tendrils,
- the circular, dark green adult leaves, with five lobes, deep club-shaped lateral sinuses with sometimes a tooth inside, an open or slightly open U-shaped petiole sinus, with often naked petiole veins, moderately long teeth compared to their width at the base with straight sides, a moderate anthocyanin coloration of veins, a slightly twisted, blistered, goffered leaf blade, and on the lower side of the leaves, no erect hairs and a low density of prostrate hairs,
- the broad ellipsoid berries.

### Cultivation and agronomic skills

Picarlat is vigorous with a semi-erect bearing. This variety can be pruned short and tends to produce a lot of grappillons.

### **Clonal selection in France**

The only certified Picarlat clone carries the number 1229.

### Phenology

Bud burst: 9 days after Chasselas. Grape maturity: mid-season, 2 weeks after Chasselas.

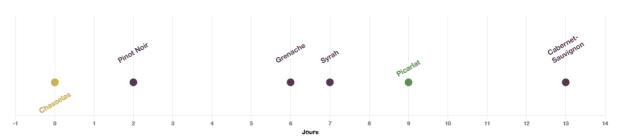

### **Technological potential**

Picarlat's bunches are medium in size and compact. The berries are also medium, simple-flavored or with a slightly herbaceous flavor, with a thin skin and a very juicy and soft pulp. Picarlat produces powerful, not very acidic, very colored and tannic wines. They have a nice aromatic intensity, with vegetal and spicy notes. Picarlat wines are suitable for ageing.

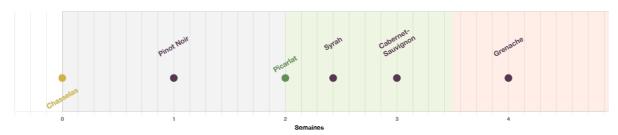

### Susceptibility to Diseases and Pests

Picarlat is sensitive to downy mildew and powdery mildew. This variety is however less affected by grey rot.

### Debourrement

### Maturité
