

Bouquettraube B

Wine grape variety.

Origin

This variety was obtained in Germany in the 19th century. Based on genetic analyses carried out in Montpellier, it would result from the crossbreeding of Sylvaner and Frankenthal.

Use

Wine grape variety.

Name of the variety in France

Bouquettraube

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Bouquettraube is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a low to medium density of prostrate hairs,
- the yellow young leaves with bronze spots,
- the circular or pentagonal adult leaves, entire or with three lobes, with shallow upper lateral sinuses, a closed petiole sinus, short teeth compared to their width at the base with convex sides, no anthocyanin coloration of veins, a twisted, revolute and goffered leaf blade, folded near the petiole sinus, and on the lower side of the leaves, a low density of erect hairs,
- the round-shaped or obloid berries, with a slightly aromatic flavor.
