Wine grape variety.

Name of the variety in France

Vintaghju

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Vintaghju is officially listed in the "Catalogue of vine varieties" since 2020 on the A list and classified.

Description elements

The identification is based on:
- the white tip of the young shoot with a high density of prostrate hairs and a piping distribution of anthocyanin coloration,
- the green young leaves with bronze spots, and on the lower side of the leaves, a high density of prostrate hairs between the veins,
- the shoots with green or red-striped internodes and long to very long tendrils,
- the circular, dark green, adult leaves, with five, seven or nine lobes, quite deep open, U-shaped upper lateral sinuses, an open U-shaped petiole sinus with often naked petiole veins, small to medium teeth, medium to long compared to their width at the base with straight sides, no anthocyanin coloration of veins, a revolute leaf blade, and on the lower side of the leaves, a medium density of erect and prostrate hairs,
- the long bunches, sometimes fasciated with bifid ends,
- the round-shaped berries.

Cultivation and agronomic skills

Vintaghju is not very fertile. Is has a semi-erect to horizontal bearing and long shoots that require trellising. This variety can be susceptible to millerandage.

Clonal selection in France

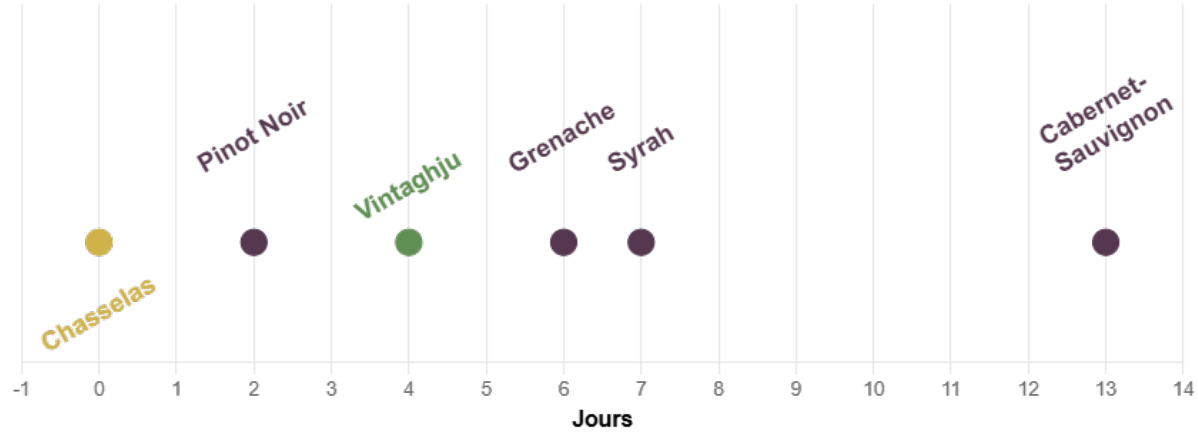

The only certified Vintaghju clone carries the number 1338.

A conservatory of 6 clones was planted in Corsica.

Phenology

Bud burst: 4 days after Chasselas.
Grape maturity: mid-season, 3 weeks after Chasselas.

Debourrement

Technological potential

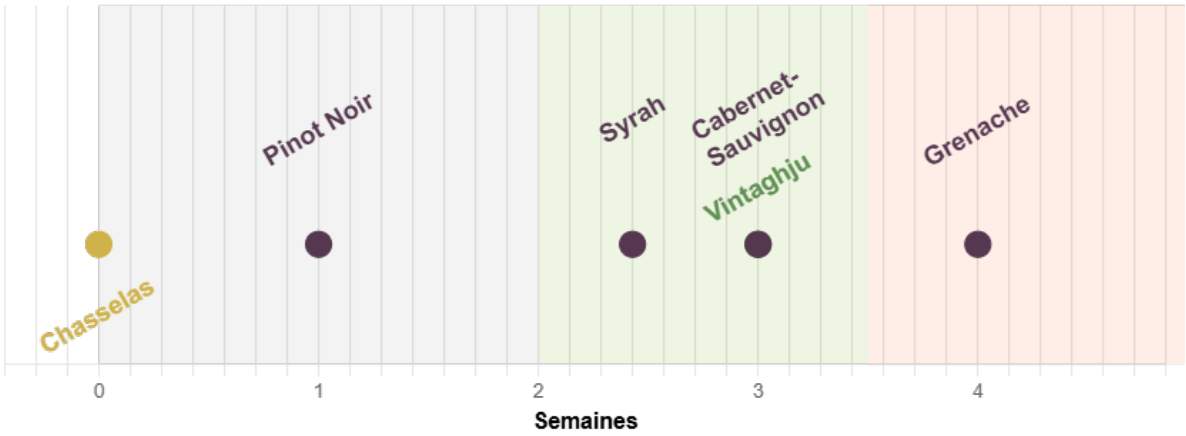

Vintaghju's bunches are large and very compact. The berries are medium in size, simple-flavored, with a thin skin, not a lot of bloom and a very juicy pulp. The wines have a nice acidity and pronounced tanins. Their color can be remarkable, deep bright red. Vintaghju wines have black fruits and spices aromas.

Susceptibility to Diseases and Pests

This variety is sensitive to grey rot and esca.
