Technological potential

The bunches and berries are medium in size. The bunches and berries are medium to large in size. This variety has good accumulation potential of sugars while maintaining a correct level of acidity, both for white and rosé wines. Colour intensity is low, producing pale rosé wines. Wines made from Mourvèdre gris have a complex, expressive profile, with mainly yellow-fleshed fruit notes.

Susceptibility to Diseases and Pests

The behavior of Mourvèdre gris towards diseases is comparable to that of Mourvèdre.
