

# Feunate N

# Wine grape variety.

### Origin

This variety would appear to originally be from the Drôme region. Based on published genetic analyses, Feunate is probably a descendant of Gouais blanc and Pougayen.

#### Use

Wine grape variety.

### Name of the variety in France

Feunate

### Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Regulatory data

In France, Feunate is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### **Description elements**

The identification is based on:

- the tip of the young shoot with a high density od prostrate hairs,
- the green young leaves with bronze spots,
- the shoots with red internodes,
- the adult leaves, entire or with three or five lobes, shallow U-shaped lateral sinuses, with a closed petiole sinus and overlapping lobes, long teeth with straight sides, a slight anthocyanin coloration of veins, a flat leaf blade, involute on the edges, and on the lower side of the leaves, a medium density of prostrate hairs,
- the ellipsoid berries.

### **Evolution of cultivated areas in France**

Year	1958	1968	1979	1988	2018
ha	68	57	6	2	0.1

## **Genetic profile**

Microsatelli	teVVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allele 1	131	236	239	176	188	244	238	245	249
Allele 2	141	238	243	178	196	256	254	247	271

### Cultivation and agronomic skills

Feunate is vigorous, fertile, productive, with an erect bearing and must be pruned short.

### **Clonal selection in France**

The only certified Feunate clone carries the number 1225. Surveys have recently been carried out in the wine-growing region of the French department of Drôme.

### Phenology

Bud burst: 2 days after Chasselas.

Grape maturity: mid-season, 3 weeks after Chasselas.

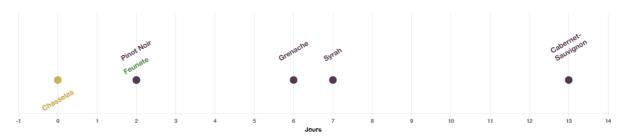

### Technological potential

The bunches are medium to large and the berries are large. Feunate produces colorfed wines that are relatively acidic with low alcoholic degree.

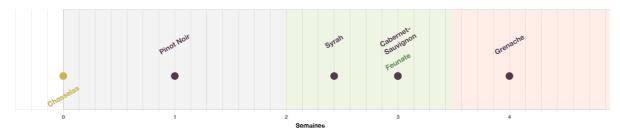

### Susceptibility to Diseases and Pests

Feunate does not show any particular sensitivity to downy and powdery mildew, but seems a little sensitive to grey rot.

#### Debourrement

### Maturité
